

## From the Desk of “Editor In Chief” of IJCRR

This issue contains many articles, case reports of interest for the readers. It is not possible for me to cover all of them in my note, but I am sure that our young researchers and especially postgraduates would take the maximum benefit out of them. For a high IF, we need to have more of good quality original articles having high citation values. All senior members are urged to submit their prime research work and consider **IJCRR** as their first-choice journal. Further, suggestions of any type, especially related to any columns to be included, are most welcome.

The colonoscopic biopsy is an efficient diagnostic tool for etiological diagnosis. The article by S. Padma, R. Pramila emphasizes the challenges and problems in colonoscopy biopsies. The diagnostic algorithm for evaluation of colonic diseases would help the readers in their approach to diagnose problematic cases. The articles of this type will help postgraduates in their outlook to problematic cases.

The nonneoplastic lesions of skin are rare with limited literature available regarding their diagnosis. Spectrum of Non-neoplastic Skin Lesions: A Histopathological Study based on Punch Biopsy by Vivek Kumar, Hansa M. Goswami is a useful study for pathological diagnosis of these lesions

Breast carcinoma is on the rise, especially in India. The article “Fulvestrant Efficacy in Artificial Menopausal Hormone Receptor Positive and Human Epidermal Growth Factor Receptor 2 Negative Metastatic Breast Cancer Patients under 50 Years Old” by Caglayan Geredeli, Nurgul Yasar illustrated the innovative markers for future prospectus in the breast cancer

Wishing the readers a happy reading.

Dr. Sachin B. Ingle [MD Pathology]

**Professor & Surgical Pathologist, Department of Pathology, MIMSR Medical College,  
Shri Siddheshwar Surgical Pathology & Research Centre, Latur 413512, Maharashtra, India**

“Editor in chief “International Journal of Current Research & Reviews”, India
